Re: Permit Amendment- Extension to Expiry Date of Air Quality Management Permit GVA 0399

Dear Mr. Naiker:

We have reviewed your June 12, 2020 email requesting the permit term for Permit No. GVA0399 be amended to November 30, 2020, to allow sufficient time to process your application for a new permit.

Pursuant to GVRD Air Quality Management Bylaw No. 1082, 2008 (as amended) and Permit No. GVA0399, your permit is hereby amended, subject to the terms and conditions listed below:

Face Page – Effective Period:

Before: The terms and conditions set out in the Permit apply to the existing or planned works as of August 01, 2016 and this permit will expire on August 31, 2020.

After: The terms and conditions set out in the Permit apply to the existing or planned works as of August 01, 2016 and this permit will expire on November 30, 2020.

All other terms and conditions prescribed in Permit GVA0399 remain unchanged.

Please contact Sonny Johal at 604-451-6537 or at sonny.johal@metrovancover.org if you have any questions.

Yours truly,

R.H. (Ray) Robb, P.Eng.
District Director
Metro Vancouver Regional District

39867917

PERMIT GVA0399

Pursuant to:

Greater Vancouver Regional District Air Quality Management Bylaw No. 1082, 2008
and the BC Environmental Management Act, S.B.C 2003, c.53

Issued to:

Ewos Canada Ltd.
(the "Permittee")

To Authorize:

the discharge of air contaminants to the air from
Fish Feed Manufacturing Plant

Located at:

7721 132nd Street, Surrey, BC V3W 4M8

Effective Period:

The terms and conditions set out in the Permit apply to the existing or planned works as of
August 01, 2016 and this permit will expire on August 31, 2020.

All previous versions of this Permit are hereby rescinded and rendered null and void.

Issued: November 16, 1992
Amended: July 22, 2016

R.H. (Ray) Robb, P. Eng.
District Director

GREATER VANCOUVER REGIONAL DISTRICT AIR QUALITY MANAGEMENT PERMIT

SECTION 1 – AUTHORIZED EMISSION SOURCES

Authorization to discharge air contaminants from the authorized Emission Sources and Works listed below is subject to the specified terms and conditions.

Approximate locations of the emission sources are shown on the Site Plan in section 4.

EMISSION SOURCE 03: Plant Air Fans #1 and #2 discharging through a Stack(s).

MAXIMUM EMISSION FLOW RATE: **850** m³/min
MAXIMUM ANNUAL OPERATING HOURS: **8760** h/y

MAXIMUM EMISSION QUALITY:

1. 50 mg/m³ Particulate Matter
2. 10% Opacity.
3. Odorous Air Contaminant(s): None past the plant boundary such that pollution occurs.

WORKS AND PROCEDURES:

Venturi scrubber and packed tower scrubber utilizing the addition of chlorine dioxide to acidic scrubbing solution, and related appurtenances, together with good operating practices. In addition, odour neutralizing agents may be used during the months of May, June, July, August and September.

EMISSION SOURCE 05: Process Air from One Wenger and One Sprout Matador dryer discharging through a Stack(s).

MAXIMUM EMISSION FLOW RATE: **1700** m³/min
MAXIMUM ANNUAL OPERATING HOURS: **8760** h/y
MAXIMUM PRIMARY BURNER INPUT FIRING RATE: **12.66** GJ/h

MAXIMUM EMISSION QUALITY:

1. 50 mg/m³ Particulate Matter
2. 10% Opacity.
3. Odorous Air Contaminant(s): None past the plant boundary such that pollution occurs.

WORKS AND PROCEDURES:

Cyclone, venturi scrubber and packed tower scrubber utilizing the addition of chlorine dioxide to acidic scrubbing solution, and related appurtenances, together with good operating practices. In addition, odour neutralizing agents may be used during the months of May, June, July, August and September.

Issued: November 16, 1992
Amended: July 22, 2016

R.H. (Ray) Robb, P. Eng.
District Director

Permit GVA0399

GREATER VANCOUVER REGIONAL DISTRICT AIR QUALITY MANAGEMENT PERMIT

Firing of the dryers with natural gas (propane standby), using good combustion practices and operating procedures.

Wind speed and direction shall be continuously monitored and recorded at the plant site. Data shall be provided to Metro Vancouver as necessary.

The permit holder shall immediately notify Metro Vancouver at 604-436-6777 of any changes to plant operations or the control works which may cause a reduction in the effectiveness of odour control.

EMISSION SOURCE 08: Fish Feed Process Building Air discharging through Doors and Vents.

MAXIMUM EMISSION FLOW RATE: **No rate of discharge is specified.**

MAXIMUM ANNUAL OPERATING HOURS: **8760 h/y**

MAXIMUM EMISSION QUALITY:

1. Odorous Air Contaminant(s): None past the plant boundary such that pollution occurs.
2. The duration and frequency of discharge is variable and intermittent.

WORKS AND PROCEDURES:

All doors and the "bird vent" shall be kept closed except for those periods when they are actually in use. All odorous air contaminants from production equipment and the warehousing and production areas of the plant shall be conveyed under negative pressure to the control works associated with Emission Numbers 03 and 05.

EMISSION SOURCE 09: Electrically heated Fish Oil and Vegetable Oil storage tanks discharging through a Vent(s).

MAXIMUM EMISSION FLOW RATE: **No rate of discharge is specified.**

MAXIMUM ANNUAL OPERATING HOURS: **8760 h/y**

MAXIMUM EMISSION QUALITY:

1. Odorous Air Contaminant(s): None past the plant boundary such that pollution occurs.
2. The rate of discharge is that resulting from vapour venting during tank filling and breathing of heated tanks and unloading railcars.

WORKS AND PROCEDURES:

Five storage tank vents and related appurtenances together with good operating practices.

Issued: November 16, 1992

Amended: July 22, 2016

R.H. (Ray) Robb, P. Eng.
District Director

Permit GVA0399

GREATER VANCOUVER REGIONAL DISTRICT AIR QUALITY MANAGEMENT PERMIT

SECTION 2 – GENERAL REQUIREMENTS AND CONDITIONS

A. AUTHORIZED WORKS, PROCEDURES AND SOURCES

Works and procedures, which this permit authorizes in order to control the discharge of air contaminants, shall be employed during all operating periods of the related sources. The Permittee shall regularly inspect and maintain all such works, procedures and sources.

The District Director must be provided with reasonable notice of any changes to or replacement of authorized works, procedures or sources. Any modification of authorized works, procedures or sources must be approved by the District Director in advance of operation. For certainty, this does not include routine maintenance or repair.

The discharge criteria described in Section 1 of this permit are applicable on the issued or last amended date of this permit unless specified otherwise. If a date different to the issued or last amended date is specified, the existing works, procedures and sources must be maintained in good operating condition and operated in a manner to minimize emissions.

B. NOTIFICATION OF MONITORING NON-COMPLIANCE

The District Director must be notified immediately of any emission monitoring results, whether from a continuous emissions monitor or periodic testing, which exceed the quantity or quality authorized in Section 1 of this permit. Notification shall be made to Metro Vancouver’s 24-hour number: 604-436-6777, or to regulationenforcement@metrovanancouver.org.

C. POLLUTION NOT PERMITTED

Notwithstanding any conditions in this permit, no person shall discharge or allow or cause the discharge of any air contaminant so as to cause pollution as defined in the Greater Vancouver Regional District Air Quality Management Bylaw No. 1082, 2008 and the Environmental Management Act.

D. BYPASSES

The discharge of air contaminants that have bypassed authorized control works is prohibited unless advance approval has been obtained and confirmed in writing from the District Director.

E. EMERGENCY PROCEDURES

In the event of an emergency or condition beyond the control of the Permittee that prevents effective operation of the authorized works or procedures or leads to unauthorized discharge, the Permittee shall:

1. Comply with all applicable statutory requirements;
2. Immediately notify the District Director of the emergency or condition and of contingency actions invoked or planned to mitigate adverse impacts and restore compliance; Notification shall be made to Metro Vancouver’s 24-hour number: 604-436-6777; and

Issued: November 16, 1992
Amended: July 22, 2016

R.H. (Ray) Robb, P. Eng.
District Director

Permit GVA0399

GREATER VANCOUVER REGIONAL DISTRICT AIR QUALITY MANAGEMENT PERMIT

3. Take appropriate remedial action for the prevention or mitigation of pollution.

The District Director may specify contingency actions to be implemented to protect human health and the environment while authorized works are being restored and/or corrective actions are being taken to prevent unauthorized discharges.

If an emergency situation results in a "spill" as defined in the Environmental Management Act Spill Reporting Regulation, the spill shall also be reported immediately to the Provincial Emergency Program by telephoning 1-800-663-3456.

F. AMENDMENTS

The terms and conditions of this permit may be amended, as authorized by applicable legislation. New works, procedures or sources or alterations to existing works, procedures or sources must receive authorization in advance of operation.

G. STANDARD CONDITIONS AND DEFINITIONS

Unless otherwise specified, the following applies to this permit:

1. Gaseous volumes are corrected to standard conditions of 20 degrees Celsius (°C) and 101.325 kilo Pascals (kPa) with zero percent moisture.
2. Contaminant concentrations from the combustion of specific fuel types are corrected to the following Oxygen content, unless specified otherwise:
 - 3% O₂ for natural gas and fuel oil; or
 - 8% O₂ for wood fuel
3. Where compliance testing is required, each contaminant concentration limit in this permit will be assessed for compliance based on a valid test using test methods approved by the District Director.
4. Visual opacity measurements are made at the point of maximum density, nearest the discharge point and exclude the effect of condensed, uncombined water droplets. Compliance determinations are based on a six-minute average in accordance with the provincial "Source Testing Code for the Visual Measurement of The Opacity of Emissions from Stationary Sources". Continuous Emission Monitor System (CEMS) opacity compliance determinations are based on a one-hour average (taken from the top of each hour).
5. If authorized in Section 1 of this permit, standby fuel use is restricted to a maximum of 350 hours per year and to those periods during which the primary authorized fuel is not available. Fuel oil sulphur content shall not exceed 15 milligrams per kilogram (mg/kg) and emissions during fuel oil firing shall not exceed 10% opacity.
6. Definitions in the Environmental Management Act and Air Quality Management Bylaw apply to terminology used in this permit.
7. Threshold Limit Values (TLV) refer to the Time Weighted Average (TWA) exposure limits for substances specified in the American Conference of Governmental Industrial Hygienists Threshold Limit Values handbook, current on the latest date that this permit issuance or amendment came into effect.
8. Sulphur Oxides (SO_x) are expressed as Sulphur Dioxide.

Issued: November 16, 1992
Amended: July 22, 2016

R.H. (Ray) Robb, P. Eng.
District Director

Permit GVA0399

GREATER VANCOUVER REGIONAL DISTRICT AIR QUALITY MANAGEMENT PERMIT

9. Nitrogen Oxides (NO_x) are expressed as Nitrogen Dioxide.
10. The Canadian Council of Ministers of the Environment (CCME) "Environmental Guidelines for Controlling Emissions of Volatile Organic Compounds from Aboveground Storage Tanks (June 1995, CCME-EPC-87E)" shall be adhered to for all applicable tanks unless otherwise stated in this permit.
11. Authorized 'Maximum Annual Operating Hours' of 8760 hours per year for an emission source is equivalent to authorization for continuous operation of the emission source for an entire calendar year, including leap years.

H. RECORDS RETENTION

All records and supporting documentation relating to this permit must be kept for at least three years after the date of preparation or receipt thereof, and be made available for inspection within 48 hours of a request by an Officer.

I. HEATING, VENTILATION, AIR CONDITIONING AND INTERNAL COMBUSTION ENGINES

Air contaminants discharged from any natural gas-fired heating, ventilation or air conditioning system for buildings and any internal combustion engine located at the discharge site shall be maintained and operated in a manner prescribed by the manufacturer to ensure good combustion of the fuel with minimum discharge of air contaminants.

Issued: November 16, 1992
Amended: July 22, 2016

R.H. (Ray) Robb, P. Eng.
District Director

Permit GVA0399

GREATER VANCOUVER REGIONAL DISTRICT AIR QUALITY MANAGEMENT PERMIT

SECTION 3 – REPORTING REQUIREMENTS

A. MONITORING REQUIREMENTS AND REPORTING

Unless otherwise approved by the District Director prior to any sampling or analysis, all measurements shall be performed by an independent agency in accordance with Metro Vancouver Air Emissions Sampling Program Manual of Methods and Standard Operating Procedures and the BC Ministry of Environment Field Sampling Manual, as they may be amended from time to time. Any variance from these procedures must receive prior approval from the District Director.

A minimum of 5 working days advance notice must be given prior to taking measurements required by this Monitoring and Sampling Program. Notification must be given to the Metro Vancouver Environmental Regulation & Enforcement Division (phone 604-436-6777, Fax 604-436-6707, email regulationenforcement@metrovancover.org).

Unless otherwise specified, sampling shall be performed under operating conditions representative of the previous 90 calendar days of operation. All field data and calculations must be submitted with monitoring results and they shall be reported in the metric units which are used in this permit. These submissions shall include process data relevant to the operation of the source of the emissions and the performance of the emission control works.

The Permittee shall conduct the following monitoring and sampling and submit electronic reports of the results to the District Director by the dates specified below using a password enabled web based application provided by Metro Vancouver.

			available to control odour in the manufacture of fish feed. This report shall be prepared by a professional knowledgeable in the field of odour control and management and shall include information on the feasibility, costs and effectiveness of methods and control systems for the reduction of odours. The use of combined technologies for optimal odour removal efficiency must also be explored as a means for continuous improvement.	Other
Facility	March 31, 2017	N/A	<p>Written report of a final dispersion model submitted to Metro Vancouver that includes updated odour sampling results and modifications made (or proposed) to improve dispersal of odours in the community.</p> <p>An updated detailed model plan using Metro Vancouver Dispersion Modelling Plan shall be submitted to the District Director by October 31, 2016 for comment, review and or revision.</p>	Dispersion Model

C. AMENDED OR ADDITIONAL REQUIREMENTS

Based on the results of the monitoring program, including the stack sampling results or any other information, the District Director may:

1. Amend the monitoring and reporting requirement of any of the information required by this Permit including plans, programs and studies.
2. Require additional investigations, tests, surveys or studies.
