

BIO – Conor Reynolds

Conor currently leads the Air Quality & Climate Change Policy team at Metro Vancouver. This team is responsible for the development and implementation of Climate 2050, Metro Vancouver’s 30-year regional climate action strategy, as well as the new Clean Air Plan, which will identify and prioritize actions to reduce air contaminant and greenhouse gas emissions in our region over the next 10 years. Conor is a professional engineer with two decades of experience related to the science, policy and management of air pollution and greenhouse gas emissions. He has a Ph.D. in Resource Management and Environmental Studies, and a M.A.Sc. in Mechanical Engineering, both from UBC.
