

BIO - Jesse Montgomery

Jesse Montgomery manages the environmental program for Metro Vancouver Water Services which supplies drinking water to the 2.7 million people in our member jurisdictions. He has background in wildfire/emergency management and fisheries biology. Current work has him actively engaged in Environmental Management System development, fisheries and stakeholder engagement activities, and water supply monitoring programs. He has been with Metro Vancouver for 14 years with much of his work focused in the water supply areas. Jesse is a BC Registered Professional Biologist.
