

## BIO - Morgan Braglewicz

As a Senior Policy and Planning Analyst with Metro Vancouver's Air Quality and Climate Change team, Morgan explores ways to implement climate solutions in the region. Her past work experiences in the energy sector and working at Natural Resources Canada and the Cree Nation Government have helped shape her interest in working on energy and climate issues with communities. Morgan relocated from Quebec to the beautiful West Coast to complete her Master's degree in Resource and Environmental Management at SFU. When she's not at work, you can usually find her outside in BC's forests, mountains and lakes.
