**Subject:** North Shore Wastewater Treatment Plant Project: October 2022 Community Newsletter

**metrovancover** | LIQUID WASTE

**October 2022**

## About the Project

Metro Vancouver is building the North Shore Wastewater Treatment Plant to replace the current Lions Gate Wastewater Treatment Plant. This new treatment facility is being built to serve 250,000 residents and businesses on the North Shore and will provide tertiary treatment to better protect the environment. Visit the [project webpage](#) to learn more.

The project is located on West 1st Street, between Philip and Pemberton Avenues, in the District of North Vancouver (see map below for location).

## Current Activity at the Treatment Plant Site

Construction continues at the treatment plant site. Activity on the site is expected to increase over the fall.

What to expect on and near the site over the coming month:

- Cranes moving materials and equipment
- Crews pouring concrete and working on concrete forms and structures
- Some construction noise from power tools, machinery, and drilling equipment
- Crews conducting survey work and inspections

- Temporary traffic impacts on West 1st Street, east of Philip Avenue, while crews complete paving near existing road plates. Advance notice and more information will be provided to adjacent businesses before work starts, as needed.

## **Staff Parking Areas**

There is expected to be an increase in people working on the treatment plant site over the coming months. To reduce impacts on local businesses and residents, we have secured three parking areas in close proximity to the site to be used by workers and staff associated with the project. These areas will be monitored regularly and parking restrictions will be enforced in accordance with District of North Vancouver bylaws, where applicable.

## **Work Hours**

Monday to Friday between 7:00 am and 8:00 pm

Saturdays between 9:00 am and 5:00 pm

All work will comply with District of North Vancouver bylaws or granted bylaw variances. Advance notification will be provided if extended working hours are scheduled.

## **Project Map**

# NORTH SHORE WASTEWATER TREATMENT PLANT PROGRAM

*This map shows the locations of the three projects included in the North Shore Wastewater Treatment Plant Program:*

- The new treatment plant (under construction)
- The pump station (complete) and conveyance pipes (partially complete)
- The existing Lions Gate Wastewater Treatment Plant (to be decommissioned when the new plant is complete)

## Wipe it, Green Bin It

Putting fats, oils, and grease down the sink can cause a real pain in the drain. As they travel through pipes and sewers, these items harden and pick up other materials along the way. The result: clogged pipes in your home and blocked sewers that can overflow into homes, businesses, and the environment.

Save your pipes (and your sewers): put fats, oils, and grease in your green bin, not down the drain.

## Keeping the Community Informed

You are receiving this information because you signed up for updates on the North Shore Wastewater Treatment Plant Project. Updates are sent by Metro Vancouver via email newsletter and posted on the [project webpage](#).

If you know others who are interested in the project, please forward this email to them and encourage them to sign up to the mailing list by visiting the [project webpage](#) and clicking on the “Sign Up” button under “Stay Connected”.
