

When fats, oils and grease go down your drain, they can harden and cause clogged pipes, backed-up sewers and expensive repairs.

Put these items in your green bin, not your drain:

FATS: dairy products, margarine, shortening and gravy.

OILS: cooking oils (olive, coconut, canola, vegetable, peanut, etc.), salad dressings, and mayonnaise.

GREASE: animal fat left over from cooking meat.

Larger amounts of cooking oil and grease can be taken to a depot with other recycling. Visit wipeitgreenbinit.ca to find a depot near you that accepts grease.
