NORTH ROAD SEWER CONSTRUCTION
Metro Vancouver is improving the North Road Sewer to protect public health and the environment.

Project Summary
The North Road Sewer pipe collects sewage from Burnaby and Coquitlam, and carries it to the Annacis Island Wastewater Treatment Plant. To ensure wastewater continues to be managed safely and to accommodate growth, the North Road Sewer pipe needs to be upgraded.

Construction will take place in multiple phases, is expected to begin in summer 2019 and continue for approximately one year.

DID YOU KNOW
The North Road Sewer will be approximately 2,300 metres in length, which is nearly six laps around an Olympic running track.

Metro Vancouver plays a key role in providing safe, efficient wastewater conveyance and treatment for 2.5 million people in the Lower Mainland. Managing this extensive liquid waste system requires ongoing upgrades, improvements, and maintenance.
Construction Impacts

Impacts associated with this work include:

• Temporary traffic lane closures and delays
• Temporary property access restrictions (alternate access points will be provided and advance notice will be given)
• Increased truck traffic on nearby roads
• Noise
• Dust

Work Hours

Work will occur from Monday to Friday, between 7:00 am and 8:00 pm and Saturday between 9:00 am and 6:00 pm. However, there may be times when crews will work extended hours in order to maintain the construction schedule. Information updates will be provided as construction proceeds.

Community Liaison Officer (CLO)

A CLO has been assigned to this project. The CLO will meet with residents, businesses, and community associations to discuss the project impacts, and will be available to address concerns during the project. A public open house will be held this spring.

Our Commitment to You

Metro Vancouver is working with the City of Burnaby, City of Coquitlam, and City of New Westminster to minimize the impact of this project on residents, businesses, and commuters in the area. As part of our commitment, Metro Vancouver will:

• Have a Community Liaison Officer available to ensure concerns and interests are heard and considered
• Keep the community informed of construction schedules and impacts using on-site signage, traffic advisories, and website updates
• Provide open, clear communications on a regular and timely basis
