## Notes:

1. To meet this estimated demand, funding from other levels of government is required.
2. Increase in total households over 10 years based on regional population and household projections. Regional total exceeds municipal aggregate totals due to municipal variance.
3. Very Low Income <\$30,000/year, Low Income <\$30,000-50,000/year, Moderate Income \$50,000-75,000/year, Above Moderate Income \$75,000-\$100,000/year, High Income \$100,000/year plus.
4. Household maintainer rates and cohort projection method using census/NHS based household maintainer rates and projected demographic characteristics (age, births, deaths, immigration, Canadian migration, intra-regional migration). Assumes that household income and household type ratios remain constant over the projection period. See Metro Vancouver Regional Planning, Metro Vancouver Housing Demand Projections – Overview of Assumptions and Methodology, Dec 2015.
5. The Housing Demand Estimates are not targets. These estimates are provided only as reference to assist in long range planning and represent a mid-range/ average trend projection based on the existing rental households in that municipality.
6. The housing demand estimates set out in Table A.2 are net additional units based on the population and household projections set out in Table A.1.
7. Anmore, Belcarra, and Lions Bay are not included in the table above given the modest levels of growth anticipated in these communities.
8. Bowen Island is not included in the table above as it does not fall under the jurisdiction of the regional growth strategy.
