Together we’re keeping food out of the garbage
Food scraps recycling

Rules are in place to encourage residents and businesses in Metro Vancouver to separate food scraps from garbage.

Surcharges are applied to loads of garbage containing over 25% food at regional disposal facilities.

What are green bin materials?
• All food, including bones, eggshells and sauces
• Coffee grounds/filters and tea bags
• Wooden utensils, chopsticks and toothpicks
• Napkins, pizza boxes and uncoated paper plates
• Small amounts of grease
• Paper bags or newspaper used to collect food scraps

Why recycle food scraps?
About 40% of all garbage sent to landfills is compostable. Food buried in landfills releases methane, a powerful greenhouse gas that contributes to global warming.

About 250,000 tonnes can be kept out of the landfill each year by separating food scraps and other organics from garbage.
